NOTICE

TO WHOM IT MAY CONCERN

We are pleased to announce that Calgon Carbon Corporation, the parent company of Chemviron Carbon has acquired Sutcliffe Speakman Ltd in the United Kingdom, formerly an operating unit of Waterlink Speciality Products.

This acquisition combines the strengths of both companies in providing a wider range of capabilities to supply activated carbons, reactivation and services to our customers.

We are very excited about working with our colleagues at Sutcliffe Speakman and believe this will enable us to better serve our customers in meeting the increasingly stringent requirements of the market place.

We will continue to supply the existing range of activated carbons, reactivation services, service equipment and engineered systems and expect to complement this with the products and services of Sutcliffe Speakman in the future.

We expect that these changes will have no effect on the way that you as a customer will deal with us and in the event of changes, will keep you fully informed.

We now look forward to being of continued service to you and to demonstrating our combined capability.

Yours faithfully
Chemviron Carbon Limited

Nigel Taylor
Sales Director
